Summary

Software Engineer and Business Systems Specialist with 25+ years of experience in enterprise software development, data analysis, business process automation, project management, and IT consulting.

- Extensive background in designing and developing enterprise information systems using Oracle Forms, Oracle Reports, SQL and PL/SQL.
- Proven track record in inventory management, workwear accounting, and railway transport management solutions still in operational use.
- Skilled in data analysis, reporting, requirements gathering, stakeholder communication, and enterprise application support.
- Recently expanded expertise into modern web applications and analytical platforms using **React, Node.js, Express, PostgreSQL, and cloud technologies**.
- Interested in opportunities in **Data Analytics, Business Intelligence, Full Stack Development, Business Analysis, and Data Engineering**.

Personal Projects

Memories — Personal Knowledge Management Platform

Stack: React, Node.js, Express, PostgreSQL, JWT, Cloudinary

- Designed and developed a full-stack web application from scratch.
- Implemented authentication, note management, media storage, and responsive UI.
- Designed REST APIs and database architecture.
- Deployed and maintained production environment.

GardenPay – Community Finance & Property Management Platform

Enterprise-style web application designed to automate financial and operational management processes for a community association.

Stack: React,TypeScript, Node.js, Express, PostgreSQ, Supabase, Vercel

Key Contributions

- Defined business requirements and application architecture.
- Designed relational database structures and financial workflows.
- Implemented contribution, tariff, payment, and debt-management processes.
- Developed dashboards and analytical reports.
- Implemented role-based access control and security model.

Business Features

- Property Management
- Member Registry
- Contribution Management
- Tariff Administration

- Utility Meter Accounting
- Accrual Processing
- Payment Processing
- Debt Monitoring
- Financial Reporting
- Dashboard Analytics
- Audit Trail

Demonstrated Competencies

- Solution Architecture
- Business Analysis
- Financial Process Modeling
- Data Modeling
- Reporting & Analytics
- Full Stack Development

Migration Data Analyzer — Data Validation Tool

Stack: JavaScript, PostgreSQL, SQL

- Developed a solution for validating and comparing datasets during migration.
- Implemented discrepancy detection and analytical comparison functionality.
- Created tools for identifying data inconsistencies and supporting migration quality control.

Conv Schedule — Scheduling and Planning Application

Stack: React, Node.js, PostgreSQL

- Built a scheduling solution for managing events and resource allocation.
- Designed database structures and scheduling workflows.
- Implemented application logic and user interface components.
-

NAIAN — News Analytics Platform

Stack: React, Node.js, PostgreSQL

- Designed architecture for collection, classification, and analysis of news data.
- Developed structures for regions, topics, events, and summaries.
- Implemented concepts for aggregation and analytical reporting.
- Focused on transforming large volumes of information into structured insights.

Professional Experience

SAP SD/QM Consultant — ArcelorMittal Kryvyi Rih, Ukraine (2017–Present)

- Configured SAP SD and QM functionality (company structures, sales processes, trade documentation).
- Analyzed business requirements and prepared functional specifications.
- Supported business users and provided functional consulting.
- Participated in data archiving, historical data analysis, and data quality activities.

Key Skills: SAP SD, SAP QM, Business Analysis, Requirements Engineering, Data Analysis, Reporting.

Project Manager / IT Consultant / Data Analyst / Developer — ArcelorMittal Kryvyi Rih, Ukraine (2013–2017)

- Managed IT projects with 5–15 team members.
- Conducted vendor and solution evaluations.
- Performed business and data analysis for management reporting.
- Developed and enhanced business applications.

Key Skills: Project Management, Data Analysis, Business Analysis, Application Development.

Head of Division / Lead Software Engineer — ArcelorMittal Kryvyi Rih, Ukraine (2001–2013)

- Managed IT division and coordinated development teams.
- Designed, developed, and maintained enterprise information systems.
- Supported production systems and business users.

Major Systems Developed:

- Inventory Management System
- Workwear Accounting System
- Railway Transport Management System
- Corporate Reporting Solutions
  Technologies: Oracle Forms, Oracle Reports, Oracle Database, SQL, PL/SQL

Skills

- **Programming:** React, Node.js, Express, TypeScript, PostgreSQL, Python, Flask,VBA
- **Database:**Postgres, Oracle, MongoDB
- **Enterprise Systems:** Oracle Forms/Reports, SAP SD/QM
- **Data Analysis:** SQL, PL/SQL, DuckDB, BI tools
- **Deployment:** Vercel, Render, Cloudinary
- **Other:** Project Management, Business Analysis, Documentation, Reporting

Education

Bachelor's Degree in Automation of Computer-Integrated Systems and Robotics
Kryvyi Rih National University
Expected Graduation: 2026

Master's Degree in Economics
Kryvyi Rih National University
2000–2001

S**pecialist Degree in Economics and Mathematics**
Kryvyi Rih National University
1999–2000

Bachelor's Degree in Economic Cybernetics
Kryvyi Rih National University
1995–1999

Bachelor's Degree
Automation of Computer-Integrated Systems and Robotics
