PROFESSIONAL SUMMARY

Senior Data Analyst with 25+ years of experience in data analysis, business intelligence, reporting, enterprise information systems, and operational analytics within a large international manufacturing environment. Extensive experience working with large datasets, business process data, transportation statistics, inventory management, fuel consumption analytics, ERP systems, and enterprise reporting.

Strong expertise in SQL, Oracle Database, SAP ERP, data validation, reconciliation, data quality management, KPI reporting, dashboard development, and analytical decision support. Experienced in transforming complex operational data into actionable business insights for management and business stakeholders.

Skilled in data extraction, cleansing, transformation, reporting automation, business analytics, and process optimization using SQL, Excel, Power BI, Tableau, Python, Oracle technologies, and enterprise ERP systems.

CORE COMPETENCIES

- Data Analysis
- Business Analytics
- Business Intelligence
- SQL
- Advanced Excel
- Power BI
- Tableau
- Data Visualization
- KPI Development
- Dashboard Development

- Data Validation
- Data Reconciliation
- Data Quality Management
- Data Cleansing
- Data Transformation
- Reporting Automation
- Statistical Analysis
- Enterprise Reporting
- Root Cause Analysis
- Business Process Analytics
- Predictive Analytics
- Oracle Database
- PostgreSQL
- SAP Data Analysis
- Python
- Pandas
- Data Mining

PROFESSIONAL EXPERIENCE

Senior Data Analyst | SAP Data Analyst

ArcelorMittal Kryviy Rih, Ukraine

2017 – Present

Responsibilities

- Analyze business and operational data from SAP ERP systems.
- Perform data validation and reconciliation activities during migration and transformation projects.
- Investigate data quality issues and identify root causes of discrepancies.
- Develop analytical reports for business users and management.
- Support data migration, cleansing, and quality assurance initiatives.
- Create SQL-based data analyses and ad-hoc reporting solutions.
- Collaborate with stakeholders to define reporting and analytics requirements.

- Support SAP ECC and SAP S/4HANA analytical activities. **Key Achievements**
- Participated in enterprise SAP transformation and migration initiatives.
- Performed validation and reconciliation of datasets containing up to hundreds of thousands of records.
- Improved data quality and consistency across business processes.
- Delivered analytical reports supporting operational and strategic decisions.

Data Analyst | Project Manager | IT Consultant

ArcelorMittal Kryviy Rih, Ukraine

2013 – 2017

Responsibilities

- Collected, analyzed, and interpreted operational and business data.
- Developed management reporting and analytical dashboards.
- Conducted business process performance analysis.
- Prepared statistical and analytical reports for management teams.
- Supported decision-making through data-driven insights.
- Coordinated projects focused on process efficiency and reporting improvements.

Lead Data Analyst | Lead Developer

ArcelorMittal Kryviy Rih, Ukraine

2001 – 2013

Designed and developed analytical systems supporting logistics, transportation, inventory management, fuel consumption monitoring, and operational reporting.

ANALYTICS PROJECTS

Railway Rolling Stock Statistics and Analytics System

Role: Lead Data Analyst & Solution Developer

- Developed an enterprise analytics platform for transportation operations.
- Automated collection, aggregation, and analysis of transportation data.
- Created KPI-based reporting and statistical analysis tools.
- Supported operational monitoring of more than **2,000 railway rolling stock units**.
- Delivered operational and management reporting for transportation departments.

- Enabled data-driven transportation planning and performance monitoring.

Technologies: Oracle Database, SQL, PL/SQL, Oracle Reports

Fuel and Lubricants Analytics System

Role: Lead Data Analyst & Solution Developer

- Developed analytical reporting and monitoring tools for fuel consumption.
- Automated analysis of fuel issuance, refueling activities, and consumption patterns.
- Created variance analysis reports and consumption control dashboards.
- Integrated operational data with the industrial automation platform Delta.
- Improved fuel cost monitoring and operational transparency.

Technologies: Oracle Database, SQL, Oracle Reports

Workwear Planning and Analytics System

Role: Data Analyst & Solution Developer

- Developed reporting and planning tools supporting annual planning for more than **25,000 employees**.
- Automated forecasting, inventory analysis, and replacement planning.
- Provided enterprise-wide visibility into workwear utilization and inventory levels.
- Generated management reports supporting procurement decisions.

Technologies: Oracle Database, SQL, Oracle Reports

Railway Asset Tracking and Analytics System

Role: Data Analyst & Solution Developer

- Analyzed rolling stock movements across more than **29 railway stations**.
- Developed operational reports supporting railway logistics management.
- Enabled tracking, utilization analysis, and performance monitoring.
- Improved transportation data visibility and reporting accuracy.

Technologies: Oracle Database, SQL, Oracle Reports

Materials Inventory Analytics System

Role: Data Analyst & Solution Developer

- Developed analytical solutions for materials inventory monitoring.
- Implemented reporting for stock movements, balances, and consumption trends.
- Supported inventory optimization initiatives through data analysis.
- Improved inventory reporting accuracy and visibility.

Technologies: Oracle Database, SQL, Oracle Reports

SELECTED DATA PROJECTS

Migrato

Role: Solution Architect & Data Analyst

Data validation and reconciliation platform supporting migration quality assurance and discrepancy analysis.

Key Competencies

- Data Validation
- Data Reconciliation
- Data Quality Assessment
- Exception Detection
- Data Comparison
- Reporting & Analytics

GardenPay

Role: Business Data Analyst & Solution Designer

Financial and operational analytics platform supporting member management, payments, debt tracking, and reporting.

Key Competencies

- Financial Analytics
- KPI Reporting
- Dashboard Development
- Data Modeling
- Business Intelligence

TECHNICAL SKILLS

Analytics & BI

- SQL
- Power BI
- Tableau
- Excel
- Google Sheets
- KPI Development
- Dashboard Design
- Data Visualization
- Reporting Automation

Data Analysis

- Data Validation
- Data Reconciliation
- Data Quality Management
- Data Cleansing
- Data Transformation
- Statistical Analysis
- Root Cause Analysis

Databases

- Oracle Database
- PostgreSQL
- SQL
- PL/SQL

Programming

- Python
- Pandas
- NumPy
- JavaScript
- TypeScript
- VBA

ERP Systems

- SAP ECC
- SAP S/4HANA
- SAP SD
- SAP QM

CAREER HIGHLIGHTS

- 25+ years of experience working with enterprise operational and business data.
- Built analytics and reporting systems supporting over **25,000 employees**.
- Delivered transportation analytics solutions monitoring more than **2,000 railway rolling stock units**.
- Developed reporting and monitoring solutions covering **29 railway stations**
- Participated in SAP migration, validation, and reconciliation projects involving large enterprise datasets.
- Extensive experience transforming operational data into management reports and business insights.
